Fiserv Merchant Capture with Ranger Remote

Ranger Remote allows Ranger scanner drivers to work in Chrome, Firefox, and Edge browsers with Contemporary View. This is only available for merchant capture.

Before You Begin

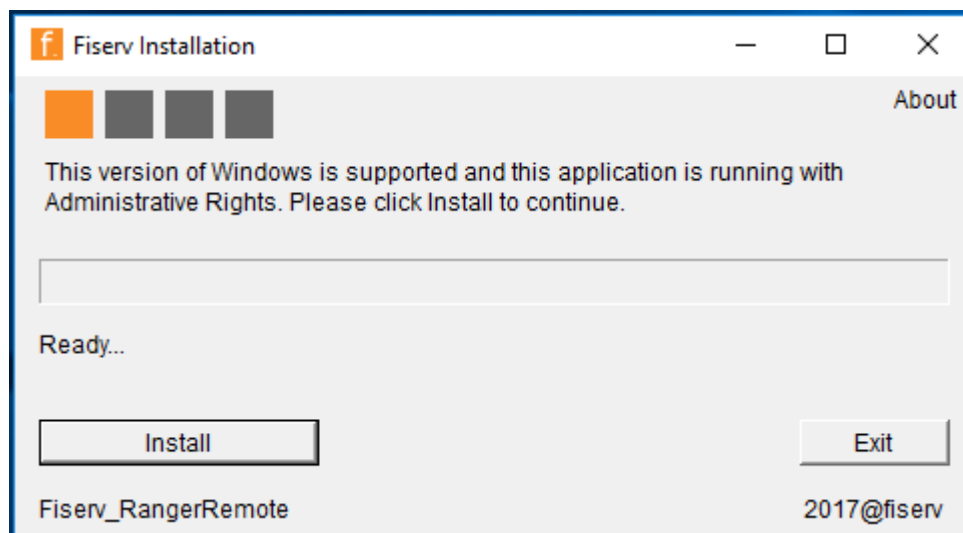

- Make sure you have installed the Ranger scanner drivers for your model before attempting to use Ranger Remote.
- Even if you normally use Classic View, non-IE browsers will automatically load Contemporary View. Make sure you know how to use Contemporary View. You can contact your financial institution for documentation or training.

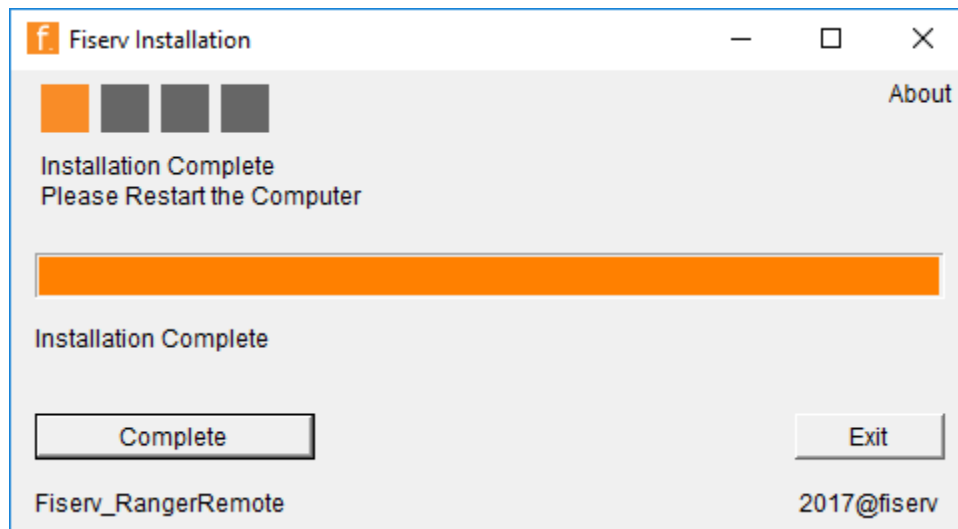

Install Ranger Remote

After logging into SCOWeb Capture FTP, save the installation to the C: drive or desktop. Do not run the application directly from the FTP site.

NOTE: The file requires admin rights to run correctly, you may need to enter admin credentials.

Click **Install** to begin. The process may take a few minutes.

Once complete, click **Exit** to close the form.

Starting up Ranger Remote the First Time

NOTE: These steps are only required right after installing Ranger Remote if it does not automatically start post-installation. The application will automatically start up when you log into Windows each time.

To launch Ranger Remote, go to **Start -> All Programs -> Silver Bullet Technology -> Ranger -> Ranger Remote** and start **Ranger Remote**.

An Icon  will appear in the bottom right taskbar.

Right click the icon and select **Start Server**.

Using Ranger Remote

Once the application is loaded and the server started, log into Web Capture on Chrome, Firefox, or Edge browsers and scan like normal.

NOTE: We tested with default settings with these browsers, but special settings may cause conflicts with the application.

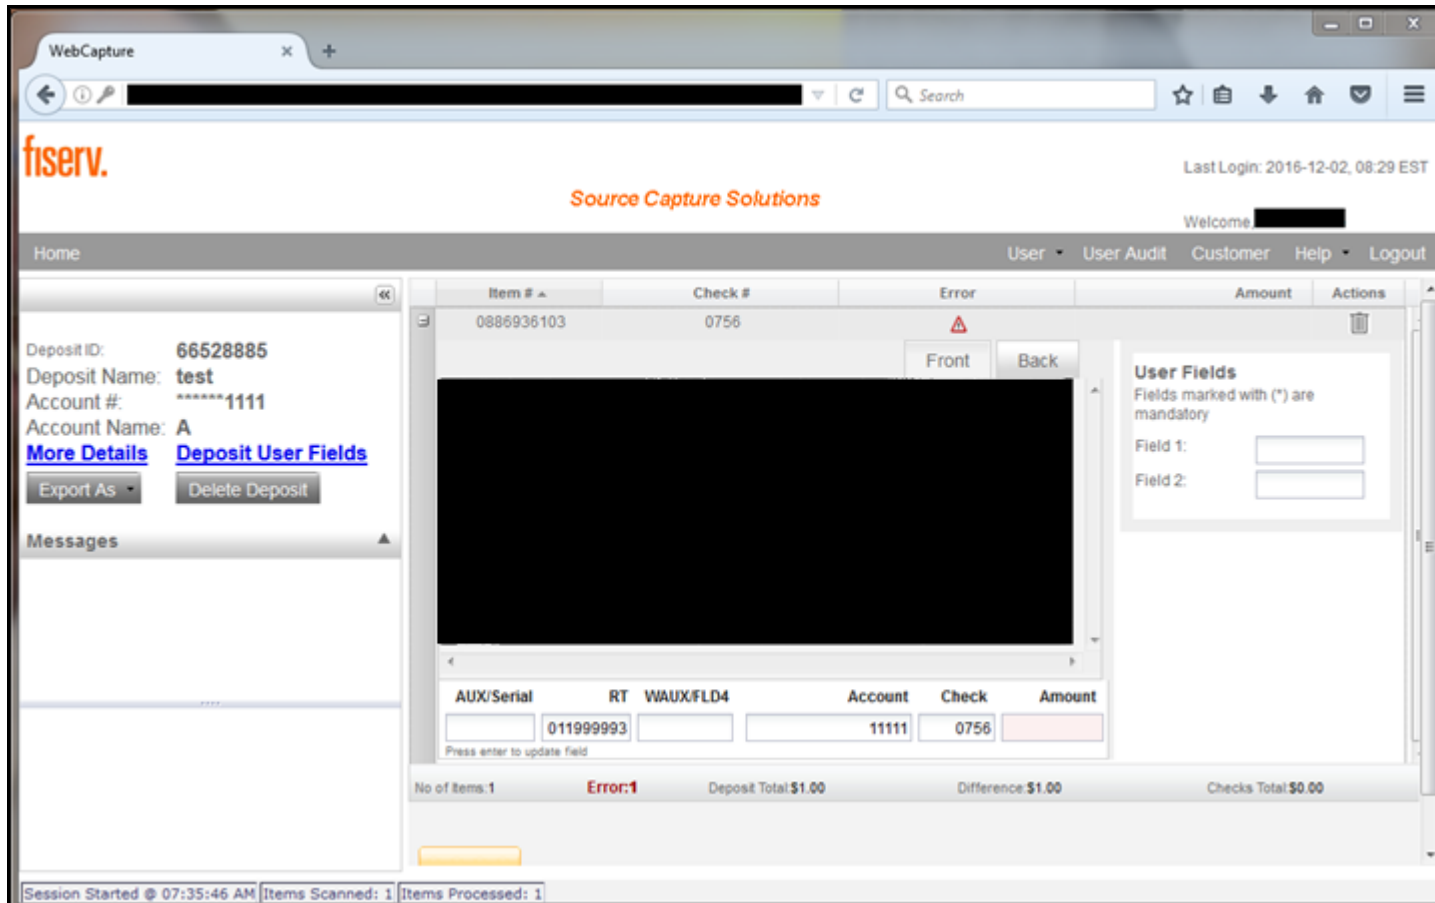

WebCapture in native Chrome

The screenshot shows the Fiserv Source Capture Solutions web application running in a Chrome browser window. The browser's address bar is redacted. The application header includes the Fiserv logo, the text "Source Capture Solutions", and a "Last Login: 2016-12-02, 08:28 EST" timestamp. A navigation menu at the top right contains "Home", "User", "User Audit", "Customer", "Help", and "Logout".

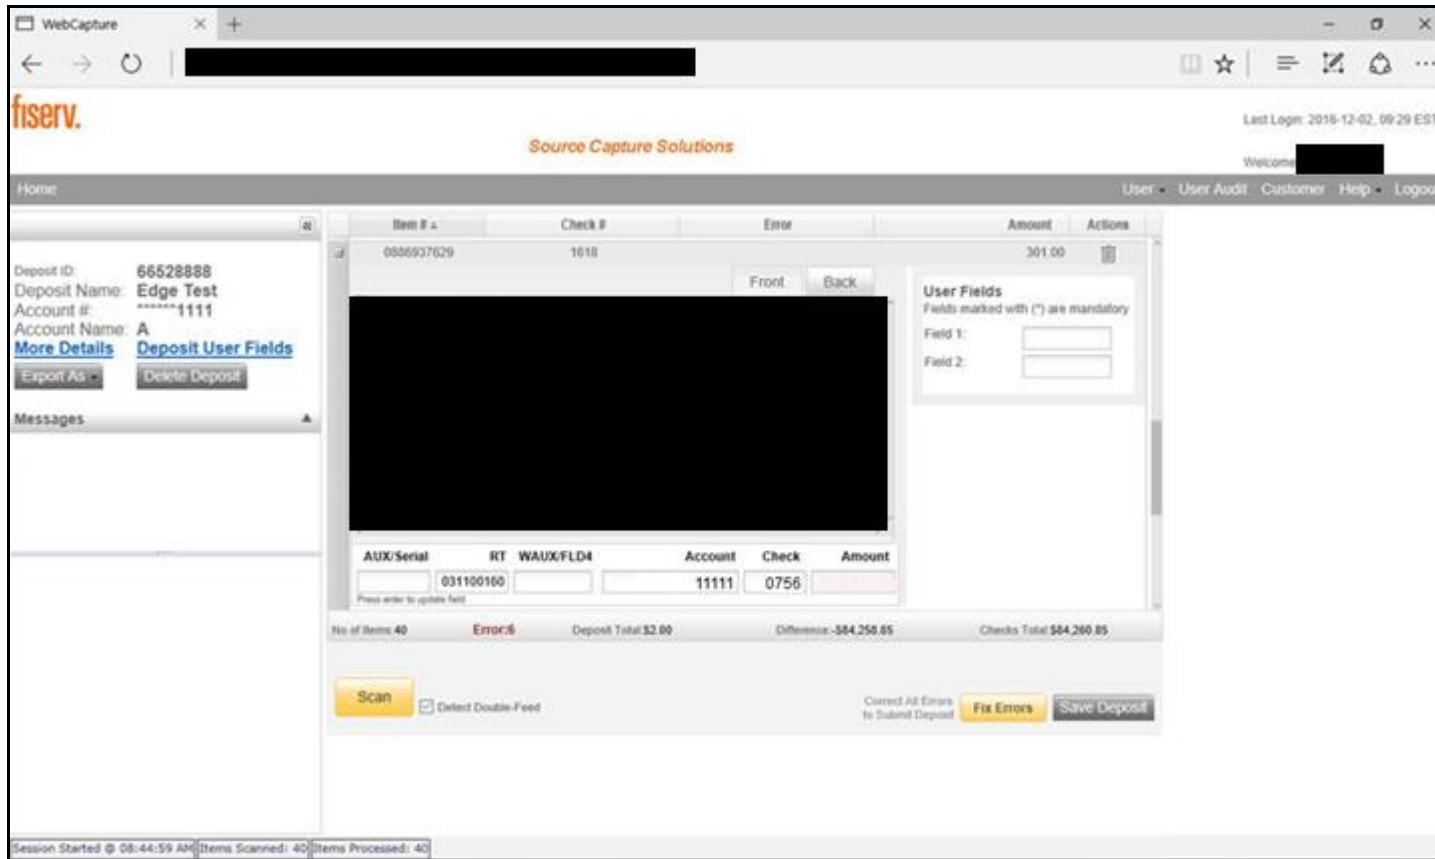

The main interface is divided into several sections:

- Deposit Details:** Located on the left, it displays "Deposit ID: 66528883", "Deposit Name: test", "Account #: *****1111", and "Account Name: A". It includes links for "More Details" and "Deposit User Fields", and buttons for "Export As" and "Delete Deposit".
- Messages:** A section below the deposit details, currently empty.
- Table:** A central table with columns for "Item #", "Check #", "Error", "Amount", and "Actions". It contains one row with "Item # 0886935104" and "Check # 0756".
- User Fields:** A section on the right with the heading "User Fields" and a note "Fields marked with (*) are mandatory". It contains two input fields labeled "Field 1:" and "Field 2:".
- Form:** Below the table, there is a form with fields for "AUX/Serial", "RT", "WAUX/FLD4", "Account", "Check", and "Amount". The "RT" field contains "011999993", "Account" contains "1111", and "Check" contains "0756". A "Scan" button is located below this form.
- Summary:** At the bottom of the table area, it shows "No of Items: 2", "Error: 1", "Deposit Total: \$1.00", "Difference: \$0.00", and "Checks Total: \$1.00".
- Footer:** At the very bottom, it displays "Session Started @ 07:29:51 AM", "Items Scanned: 1", and "Items Processed: 1".
